

Product Reset Instructions

To reset your SmartControl device to factory settings:

1. Ensure the device is powered on.
2. Locate the Reset button at the back of the device.
3. Use a pin to press and hold the Reset button for 10 seconds.
4. The LED light will blink twice indicating a successful reset.

Warning: This will erase all stored configurations and restore the device to original firmware.

Firmware Version: 2.1.4

Release Date: March 2024
